Many popular word processing and design applications allow users to export or save documents directly as PDFs. Microsoft Word, Google Docs, LibreOffice Writer, Apple Pages, Adobe InDesign, and even PowerPoint all include built-in PDF export features. Simply create your document as usual, then choose “Save as PDF” or “Export to PDF” from the file menu. This method ensures high-quality output with accurate formatting.

#### **2. Print to PDF Feature:**

Most modern operating systems, including Windows, macOS, and Linux, offer a built-in “Print to PDF” option. This feature allows you to convert virtually any printable document into a PDF file.
