Deep Dive into the Parts Diagram: Key Components and Their

Functions

Engine Components The engine is the heart of the FS55, and its diagram details parts such as the piston, cylinder, crankshaft, and ignition system. The piston moves within the cylinder, powered by the combustion of the air-fuel mixture ignited by the spark plug. The carburetor mixes air and fuel in precise proportions, which are then delivered to the combustion chamber.

Drive System The drive shaft transmits rotational force from the engine to the cutting head. It is connected via a flexible coupling that allows for movement and reduces vibration. The gear assembly acts as a torque converter, translating the rotational motion efficiently.

Cutting Head Assembly The spool contains nylon line wound in a specific configuration to maximize cutting efficiency. The diagram shows how the line feeds through the head, with a spring mechanism ensuring proper tension.

Safety components like the guard are mounted around the head to prevent debris from hitting the operator.

Fuel Delivery System The fuel tank, equipped with a cap and vent, supplies a mixture of gasoline and oil. Fuel lines connect the tank to the carburetor, with a filter preventing debris from clogging the system. The diagram highlights the placement and connection points for these lines.
