

Consumer Behaviour Schiffman And Kanuk

Consumer behaviour Schiffman and Kanuk is a foundational concept in marketing that explores how individuals and groups select, purchase, use, and dispose of products and services. Understanding consumer behaviour is vital for businesses aiming to develop effective marketing strategies, enhance customer satisfaction, and foster brand loyalty. Schiffman and Kanuk's model provides a comprehensive framework that helps marketers analyze the complex processes influencing consumer decisions, combining psychological, social, and cultural factors.

Introduction to Consumer Behaviour

Consumer behaviour encompasses the actions and decision-making processes of individuals and households when they buy goods and services. It involves examining motives, perceptions, attitudes, and influences that drive purchasing decisions. By understanding these elements, marketers can better tailor their offerings to meet consumer needs and preferences. Why is studying consumer behaviour important? - It allows businesses to predict how consumers will respond to marketing strategies. - It aids in designing products and services that align with consumer desires. - It helps identify the factors influencing purchase decisions. - It enhances customer satisfaction and loyalty.

Schiffman and Kanuk's Model of Consumer Behaviour

The model developed by Levy Schiffman and Leslie Kanuk is one of the most widely used frameworks in marketing. It integrates psychological, social, and environmental factors that influence consumer decision-making processes. The model emphasizes that consumer behaviour is a dynamic process influenced by internal and external stimuli. Core Components of the Model 1. Stimuli 2. Black Box (Consumer's Internal Process) 3. Response

Stimuli

Stimuli are external factors that influence consumer behaviour. They include:

1. **Marketing stimuli:** Product, price, promotion, place (distribution channels).
2. **Other stimuli:** Economic conditions, social influences, cultural factors, technological advances.

The Black Box: Internal Consumer Processes The "black box" refers to the consumer's internal thought process, which is influenced by: - Perception: How consumers interpret information from stimuli. - Motivation: The underlying needs and desires prompting purchase. - Learning: Past experiences shaping future behaviour. - Attitudes and beliefs: Consumers' evaluations about products or brands. - Personality and self-concept: Individual traits influencing preferences. Responses The output of the black box results in: - Purchase decision: Whether or not to buy. - Brand choice: Which brand to select. - Purchase timing: When to buy. - Post-purchase behaviour: Satisfaction, loyalty, or complaints.

Factors Influencing Consumer Behaviour

Schiffman and Kanuk highlight several factors that impact consumer decision-making, categorized into internal and external influences.

Internal Factors

These originate within the consumer and include:

1. **Motivation:** Driven by needs and wants, identified through theories like Maslow's Hierarchy.
2. **Perception:** The process by which consumers interpret stimuli, influenced by selective attention and perception biases.
3. **Learning:** Changes in behaviour resulting from experience or information.
4. **Attitudes:** Overall evaluations that influence preferences.
5. **Personality and self-concept:** Traits that determine individual choices.

External Factors

These are environmental influences, including:

1. **Cultural influences:** Values, beliefs, and customs shared by a group.
2. **Social influences:** Family, friends, social class, and reference groups.
3. **Situational factors:** Physical environment, time constraints, and purchase occasion.
4. **Marketing mix:** Product features, pricing strategies, promotional activities, and distribution channels.

The Consumer Decision-Making Process

According to Schiffman and Kanuk, the decision-making process involves several stages:

1. Problem Recognition

The process begins when a consumer perceives a gap between their current state and a desired state, triggering the need for a purchase.

2. Information Search

Consumers seek information to address their problem, which can involve internal search (memory) or external sources like advertising, friends, or online reviews.

3. Evaluation of Alternatives

Consumers compare options based on attributes such as price, quality, brand reputation, and features.

4. Purchase Decision

The choice is made based on evaluation outcomes, influenced by factors like store environment, salesperson, or promotional offers.

5. Post-Purchase Behaviour

After buying, consumers evaluate their satisfaction, which affects future purchasing decisions and brand loyalty.

Applying Schiffman and Kanuk's Model in Marketing Strategies

Marketers utilize this model to craft targeted campaigns by understanding the factors that influence consumer behaviour. Here are some practical applications:

- Segmentation and Targeting** By analyzing internal and external influences, marketers can segment consumers based on their needs, preferences, and behaviours, allowing for personalized marketing.
- Product Positioning** Understanding consumer perceptions helps in positioning products effectively, emphasizing features that resonate with target audiences.
- Promotional Strategies** Insights into decision-making stages inform the design of

promotional activities, such as advertising, discounts, or experiential marketing, to influence consumer choices. Customer Relationship Management Post-purchase behaviour insights help in developing loyalty programs and after-sales services to retain customers.

Challenges and Limitations of the Model

While Schiffman and Kanuk's model offers a comprehensive framework, it has some limitations: - Complexity of human behaviour: Not all decision processes follow a linear path; some are impulsive or habitual. - Cultural variability: The model may not fully account for cultural differences influencing behaviour. - Rapid technological changes: The advent of digital media has transformed information search and decision-making processes. - Individual differences: Personal traits can lead to diverse responses to the same stimuli. Despite these limitations, the model remains a valuable tool for understanding consumer behaviour in various contexts.

Conclusion

Understanding consumer behaviour through the lens of Schiffman and Kanuk's model offers valuable insights into the multifaceted nature of purchasing decisions. By analyzing the interplay of stimuli, internal processes, and responses, marketers can develop strategies that effectively influence consumer choices and foster brand loyalty. As markets evolve with technological advancements and cultural shifts, continuous research and adaptation of these models are essential for businesses aiming to stay competitive and meet consumer expectations. In essence, mastering the principles outlined by Schiffman and Kanuk equips marketers with the tools needed to navigate the complex landscape of consumer behaviour and create meaningful, impactful marketing campaigns.

Foundational Theories and Models

Schiffman and Kanuk build upon various psychological and economic theories to explain consumer decision-making. Their models serve as tools for marketers to interpret and anticipate consumer actions.

Consumer Decision-Making Process

The core model outlined by Schiffman and Kanuk delineates a series of stages: 1. Problem Recognition: The consumer identifies a need or desire. 2. Information Search: Gathering information about potential solutions. 3. Evaluation of Alternatives: Comparing options based on attributes like price, quality, and features. 4. Purchase Decision: Choosing a product or service. 5. Post-Purchase Behavior: Assessing satisfaction and potential future actions like repurchase or advocacy. This linear process, while simplified, highlights the importance of each stage and the factors influencing movement from one phase to another.

Types of Consumer Decisions

- Routine Response Behavior: Habitual purchasing with minimal effort (e.g., everyday groceries). - Limited Decision-Making: Moderate effort in decision processes (e.g., choosing a new restaurant). - Extensive Decision-Making: Significant effort, research, and evaluation (e.g., buying a car or house). Schiffman and Kanuk emphasize that the decision type influences marketing strategies, communication channels, and messaging.

Internal Factors Influencing Consumer Behavior

Understanding internal psychological factors helps marketers craft messages that connect on a personal level.

Motivation

- Driven by needs, which can be classified as biological (e.g., hunger) or psychological (e.g., self-esteem). - The Maslow Hierarchy of Needs is pivotal, ranging from basic physiological needs to self-actualization. - Marketers target specific needs to motivate purchasing behavior, such as luxury brands appealing to esteem needs.

Perception

- The process of selecting, organizing, and interpreting sensory information. - Consumers form perceptions based on their senses, prior experiences, and expectations. - Perceptual biases (e.g., halo effect, selective perception) can significantly influence how a product is viewed.

Learning and Memory

- Consumers learn through experiences, advertising, and word-of-mouth. - Repetition, reinforcement, and associations help embed products into consumers' memory. - Brand loyalty often hinges on positive learning experiences and strong memory cues.

Attitudes and Beliefs

- Attitudes are rooted in beliefs and influence future behavior. - Marketers aim to shape or change attitudes through persuasive communication. - The Theory of Reasoned Action suggests that intentions, shaped by attitudes and subjective norms, predict behavior.

Personality and Self-Concept

- Consumers' personalities influence their preferences and choices. - Self-concept (how consumers perceive themselves) impacts brand selection aligning with their identity. - Marketers often target specific personality segments to create tailored campaigns.

External Factors Affecting Consumer Decisions

External influences include social, cultural, and situational factors that shape consumer behavior.

Social Factors

- Reference Groups: Family, friends, colleagues that influence opinions and decisions. - Roles and Status: The position within social groups affects preferences. - Word-of-Mouth: Recommendations impact trust and credibility. - Social Media: Platforms significantly sway opinions and facilitate peer influence.

Cultural Factors

- Culture encompasses shared values, beliefs, customs, and traditions. - Subcultures (e.g., regional, ethnic) have unique consumption patterns. - Cultural norms influence perceptions of products and acceptable behaviors.

Personal Factors

- Age, gender, income, education, occupation, and lifestyle shape preferences. - Life cycle stages impact needs and consumption patterns. - Personal values and interests also steer choices.

Situational Factors

- Purchase environment, time constraints, and physical surroundings. - Special occasions or events can trigger specific buying behaviors. - Temporary factors like sales or promotions influence decision urgency.

Psychological Processes and Consumer Behavior

The interplay of psychological processes determines how consumers interpret information and make decisions.

Motivation and Needs

- Drives are internal states prompting action. - Marketers tap into underlying needs to motivate purchases (e.g., security, belonging).

Perception and Exposure

- Consumers are exposed to numerous stimuli; perception filters relevant information. - Effective marketing ensures product visibility in the right context.

Learning and Conditioning

- Classical Conditioning: Associating products with positive stimuli. - Operant Conditioning: Reinforcing behaviors through rewards or penalties.

Attitudes and Persuasion

- Attitudes are learned predispositions. - Persuasive communication aims to alter or reinforce attitudes via messages, source credibility, and emotional appeals.

Consumer Buying Behavior and Segmentation

Understanding different consumer segments allows marketers to tailor efforts effectively. - Behavioral Segmentation: Based on purchase behavior, loyalty, usage rate. - Demographic Segmentation: Age, gender, income, education. - Psychographic Segmentation: Lifestyle, personality, values. - Geographic Segmentation: Location, climate, urban vs. rural. Schiffman and Kanuk advocate for integrating multiple segmentation bases for precise targeting.
