The Genesis and Purpose of the Chaos Report

Origins of the Report

The Standish Group, founded in 1985 by Jim Johnson, originally aimed to analyze the causes of project success and failure in the IT industry. Recognizing the persistent

issues faced by organizations in delivering software projects, Johnson and his team set out to quantify the problem, gather empirical data, and identify patterns that could inform better practices.

Objectives

The primary objectives of the Chaos Report include:

1. Quantifying project success, failure, and challenge rates.
2. Identifying common causes of project failure.
3. Providing actionable insights for improving project outcomes.
4. Benchmarking industry performance over time.

Scope and Methodology

The report surveys thousands of IT projects globally, collecting data on project plans, execution, and results. The key metrics include:

1. Project Success: Delivered on time, within budget, and with required features and functions.
2. Project Challenge: Delivered with significant deviations but still functional.
3. Project Failure: Abandoned, canceled, or delivered unusable.

Data is analyzed statistically to identify trends, patterns, and correlations, providing a comprehensive picture of project health across industries and project sizes.

Key Findings of the Chaos Report

Success, Challenge, and Failure Rates

One of the most cited statistics from the Chaos Report is the distribution of project outcomes:

1. Success Rate: Historically around 30–32%. These projects are delivered on time, within budget, and meet requirements.
2. Challenged Projects: Approximately 44–50%. These projects have significant issues—such as delays or budget overruns—but are ultimately usable.
3. Failed Projects: Roughly 18–20%. These projects are canceled, abandoned, or unusable upon completion.

These figures, although they have shown some improvement over time, underscore the ongoing challenges faced by IT projects worldwide.
