What Is Organizational Diagnosis?

Organizational diagnosis is a systematic process used to identify issues, strengths, and areas for improvement within an organization. It involves collecting data, analyzing organizational elements, and interpreting findings to develop actionable strategies. The goal is to understand the current functioning of an organization to facilitate effective change management and strategic planning. This process is akin to a medical diagnosis for an organization—detecting problems before they escalate and prescribing interventions that promote health and efficiency. It considers various dimensions, including structure, culture, processes, and human resources.
